This is a story that will make you hold your breath and keep you tense with excitement

Start 8 p.m., 25c and 50c

Appeals To Be Heard Against Equalised Grain Rate Order

Ottawa, Sept. 11.—The application of the C.P.R. for the suspension of the order lowering the freight rates on Pacific export grain, will be given a public hearing on Tuesday, September 29.

At the same time, a similar application will be heard from the Montreal Board of Trade. The written applications for suspension of the Pacific export grain rates that the matter be left in abeyance until such time as the Commission shall deal with the entire freight rate structure as instructed by Parliament.

Regina, Sask., Sept. 14.—Saskatchewan, will oppose the application of the Montreal board of trade made to the board of railway commissioners on behalf of the Montreal Corn Exchange Association for suspension of the recent order issued by the board equalizing rates on grain and flour moving westward for export, Hon. J. A. Cross, attorney-general, announced to night. Saskatchewan will uphold the order of the board of railway commissioners.

Mr. Cross left for Edmonton to confer on joint action to be taken by Brit. Columbia, Alberta and Saskatchewan.

Grain Rates in Effect Monday

Changes in the tariff of west-bound grain over Can. Pac. Ry. lines from Saskatchewan and Alberta went into effect mid-night, Monday.

A heavy rain fell in this district throughout Wednesday. It was intermittent at Carleton Place and the sun shone the greater part of the day at Swift Current.

All vacant houses in town are now practically occupied for the winter months.

A LIBERAL MEETING in the interest of Dr. Gershaw, candidate, Federal Constituency of Medicine Hat will be held at Empress Theatre, on Friday, Sept. 25, at 8 p.m. Everybody invited.

Death of Henry Otting Remains Are Shipped East

The death took place at the local hospital on September 10, of Henry Otting of the Vandyne district. The body was taken to Wimbledon, N. Dak. by his son, J. H. Otting. Mr. Otting accompanied her son, East. The sympathy of the community is with the bereaved relatives.

Broken Leg on prairie all night

Elmer Juvey, of Bursfield, was admitted to the hospital on Sept. 11, with a badly fractured leg. Mr. Juvey was thrown from his horse at dusk and remained out on the prairie till morning. He is now improving favorably.

Dies Following Stroke

Mrs. McCauley, sr., of Vandyne, was seized with an apopleptic stroke on Monday morning and with a second stroke Tuesday morning. Dying Tuesday afternoon.

Many Patients At Hospital

A new record was set for the local hospital on Wednesday, last week, when fifteen patients were under care.

The Clean Town

Cleanliness, it is said, is next to godliness. A dirty individual is neither clean spiritually nor mentally. Dirty makes for ruin physically, mentally, morally. This is as true of the town as it is of the individual. The dirty town, the town full of rubbish, of untidy houses, of muddy streets, of unsanitary conditions, is non-progressive materially, morally and educationally. Neither moral or material advancement flourish in dirty, unclean surroundings.

If any town or city is ambitious for advancement, or even a few of its numbers are ready to devote their time and energy to the betterment of the community, the surest way to achieve success is to clean-up. Make backyards and front yards clean. Make streets clean and keep them clean. Encourage people to beautify their homes and their yards. Stimulate a love for and a pride in their homes and town, repair the tumble-down yard fences, paint up, make things as clean outside as they should be inside, and then the people will look up mentally, morally and materially.

FAREWELL PARTY FOR POPULAR YOUNG PEOPLE

On Tuesday evening at the home of Mr. and Mrs. J. N. Anderson, the members of the Choir of the United Church met in a social gathering to say farewell to Miss O. Boyd, who is leaving to attend Saskatchewan University, also to Roy Beasock who is to enter the University as a law student. Jasper Lacy, was another honored guest, he is leaving to attend Normal school at Calgary.

The evening was spent in contests, music and singing, after which supper was served.

The best wishes of the community go with these popular young people, who have always been willing to help out in public affairs in every way.

Mrs. F. Sibley and children have returned to town after an extended holiday at the coast and with her mother at Lunenburg. Mr. Sibley, also, is now back on his old job at the Can. Pac. Ry. freight sheds.

H. H. Hall, has now recovered from his recent illness and we are pleased to see him back in his position as C.P.R. agent.

U.F.A. Convention to nominate a candidate to contest the Anadira Federal Constituency, is to be held at Hanna, Alta., on October 2.

E. G. Livermore, B.A., Pres. Toronto Univ. Liberal Club, returned Tuesday morning from East. He spent Monday night at the Manse. Mr. Livermore goes East to enter Osgoode Hall as a law student. We hope he will make as good a lawyer as preacher.

Before placing your order for Christmas Cards, do not fail to see us. We have a very nice selection. —"EXPRESS," Empress.

He: "I wish I could land a good job right now."
She: "My brother works on a farm."

He: "I wish I could; but I any fever, thank goodness."

Parents, scholars, teachers and officers of the United Sunday School are urged to work for a special success on Bally Day, Sunday, September 27. At the evening hour of worship, Rev. N. W. Whitmore, will have a message of peculiar interest to young people.

United Church

Sunday School, 11 a.m.

In the words of Horace Bushnell, "a child can grow up a Christian and never know himself otherwise." Of course this presupposes the most commendable home and Sunday School associations. The child must have co-operation from those who have the spirit of Christ. This purpose underlies the work of religious education.

Evening service, 7:30 p.m.
On this occasion the minister will read the charge sent out this month by the Dominion Moderator, Rev. Dr. George Fiddgen, to members of the United Church throughout Canada.

Sermon topic, "Unless,"
Good music by the choir.
Come and worship with us.

Social Plains—Sunday School, at 2:00 p.m.

Beautyland—Public Worship, 3:30 p.m. Topic, "What is faith." N. W. Whitmore, Minister.

G. Dark, is in Seepre, fixing up the new Elite restaurant.

The W.M.S. will meet on Wednesday, Sept. 23, at 3:30 p.m. at the home of Mrs. Leslie Shannon.

The monthly business meeting of St. Mary's Guild will be held at the home of Mrs. Manning, on Tuesday, Sept. 22nd, at 3:30 o'clock. All members are requested to be present, if possible.

Alex. Chow, who has run the City Cafe here for several years, is leaving here and will open the new Elite Cafe at Seepre. During his stay here he has operated a first-class restaurant and secured a good share of patronage.

"The Ten Commandments"

Is a Fast Picture

There's plenty of action in "The Ten Commandments," which is to be shown at the Empress Theatre, October 10. Starting with the Biblical episode, we have the race of Pharaoh's charioteers and army across the desert in their pursuit of the escaping Israelites. Going so far as to follow them between the open walls of water where the Red Sea has opened, they are almost on top of them when the waters close, and make a watery grave. Then shipping to the modern, just at the close of the picture, we see the same commandment-breaking sea in an attempt to escape the police by a dash to Mexico in an open prison launch. These scenes show what real movie speed is. The craft seems to fly through the water, and ends by being driven onto the rock-bound coast by huge waves.

R. Simmons, was admitted to the hospital, Sept. 12.

Miss Annie Boychuk, of Seepre, who was operated on for appendicitis at the hospital last week is now improving.

Frank Pawlak returned on Tuesday from his Calgary district. He reports that the rain and snow there has been heavy, and much of the grain is likely to suffer, threshing will be held up for several days.

Mr. and Mrs. Wm. Clark and family, left on Monday morning for the States. The auction sale of the former's household effects, etc., is reported as successful.

The Cow Behind The Wagon

Useful things are said and written these days about the present generation of youths and maidens, and sharp contrasts to their disadvantages are drawn with their parents and grandparents. We hear and read so much to the effect that the young men and women this age are going to the dogs; that they lack the morals, the stamina, the strength of character of previous generations. Much the same kind of thing was said of mankind in general prior to the great War—that the race had lost its vitality, its power of endurance, its courage and willingness to sacrifice and suffer. But the war demonstrated the falsity of such statements.

None the less it is true that we have lost some of the things that made our fathers and mothers the salt of the earth. In recent years we have heard a good deal about hard times, but contrasted with what the early pioneers of this country had to endure, these years were times of plenty and ease.

The world progresses and it is only right and what should be that succeeding generations should not be called upon to undergo the trials and struggles of bygone days. But our modern civilization, with all its manifold comforts and conveniences, has caused the young men and women of today to expect too much for what they are willing to give; to assume the attitude that the world owes them a living and that they are going to collect it in the easiest and quickest possible way.

Our situation was recently directed to a little local item appearing in an "United States paper" about a couple that was taking a deferred honeymoon, a honeymoon that took place twenty-five years after marriage. In that item it was stated that this couple, which had achieved a substantial success in the marriage career since marriage, had taken the ordinary wedding trip in a lumber wagon with a cow behind the wagon, a gift of the bride's parents to the happy and hopeful couple.

This little reminder of a quarter century ago struck a popular chord in many minds, for within ten days after the article appeared not less than ten people dropped in at the newspaper office to tell the editor that they, too, had led a cow behind the wagon after the wedding ceremony, and that their only wedding journey was from the home of the bride to the home where the couple was to start housekeeping. Most of those who came in were people to whom the years have given good things, many of them being able to pay cows today by the herd, if they wanted the critters. All of them gave credit for their success in their willingness to start with little and work hard for advancement.

The cow behind the wagon, says this newspaper, is symbolic of a generation of real workers and workers who faced the world with little but their earnest ambition, willing to give for what they wanted. Armed with youth, determination, health and strength, the world was theirs for the taking. The pioneers of fifty, even twenty-five years ago, first required a horse, but the ambition of a large percentage of young people today is to own an automobile, whether they have a home or not. They will mortgage the future for present gratification. Perforce, or perhaps ignorant, that it is not the original cost but the expense; they blithely sign a bunch of promises to pay, fill in the tank with gas and are off. Off to where?

Despite all the talk of hard times, there are more advantages for the ordinary man and woman today than there have ever been before, but the men and women who wish to attain success must be prepared to pay the same price as our fathers and mothers and those before them paid—they must give before they get.

World, hard work, and lots of it is one of the five things life has to offer. There is nothing quibbling as to whether it is the bottom and climb, to start with little and accumulate for yourself. The boy or girl who does not have to strive for themselves, but who have everything found for them by their parents, are not the really fortunate ones, as we are sometimes led to believe. The young couple starting out in life where their parents left off miss the joy of achievement which their fathers and mothers experienced, and they never know that close and sympathetic comradeship which is realized by those who plan and work together shoulder to shoulder.

After Many Years

French and Belgian Troops Turn Ruhr Over to Germans

The French and Belgian troops have turned over the Ruhr to the Germans after four years occupation, undertaken to compel Germany to pay reparations. There were no disturbances, no demonstrations, and no expressions of either regret or pleasure. There were, however, many emotional partings between young French soldiers and their German sweethearts.

Waiting impatiently outside the city, 1,500 security police were assembled to take over the general policing. The allied army marched out with bands playing.

Mrs. Daugh who has just received her C. O. D. package from the butcher shop—"Here, take these codfish right back. I ordered herring."

Sometimes people don't mind their own business because they haven't a mind.

Children Cry for

MOTHER—Fletcher's

Castoria is a pleasant, harmless substitute for Castor Oil, Purgative, Teething Drops and Soothing Syrup, especially prepared for Infants in arms and Children all ages.

To avoid imitations, always look for the signature of E. J. Fletcher. Prove directions on each package. Physicians everywhere recommend it.

Rapid Fire Gun Disappears

Failed to Arrive at French Station and Cannot Be Found

Mystery surrounds the disappearance of a newly invented rapid fire gun built on lines of the Lewis gun, from which great things had been hoped. The weapon disappeared from the railroad depot at Brive la Gaillarde, France, while in transit.

The gun, which is the invention of the workman of Tulle armory, was being shipped to a proving ground for trial before a parliamentary commission prior to its adoption by the army. It failed to arrive and inquiry was started. It was traced to Brive la Gaillarde, where the box in which it had been packed was found to have been opened. Parts of the gun were scattered about the depot. It is not known whether the parts were abstracted to be copied by the enemy or if some foreign power or waiter was breaking open of the box was due to carelessness by railway employees.

Home Not Complete Without Nerviline

When your stomach is badly upset, when you are belching gas and suffering from nausea, Nerviline will come from 20 drops of Nerviline. It is sweetened water and gets an immediate result. Nerviline has been used for nearly half a century and is considered a necessity in most homes, because of its usefulness in relieving many ailments of the stomach. Sold everywhere in 35 cent bottles.

Trying New Experiment

Boys in London Orphanage Educated As Individuals

In this day of specialization it is in education which is being tried, so far with signal success, by one of the orphanages of London. Each boy is treated as an individual, and a separate timetable is drawn up for his benefit. Class work is in this way discontinued altogether. A boy is encouraged to specialize in the particular branch for which he is fitted, and the confident hope is expressed that in this way some of the best institutions send out into the world will be found specially equipped for the vocation in life they are to follow.

TONIC TREATMENT FOR INDIGESTION

The Surest Way to Relieve Stomach Trouble is Through Dr. Williams' Pink Pills

When the stomach is feeble and food lies in it undigested, the poisonous gases distend the walls of the stomach and cause indigestion. Indigestion with the other organs, especially with the action of the heart and lungs. These poisonous gases have other ill effects. They are absorbed into the blood and so weaken the system that it is as if the blood were corrupt it is as to cause acids in the system and cause the formation of unhealthy tissues everywhere. Experience shows that the stomach is vanishing just as soon as the stomach is made strong enough to digest the food. It is the only way to get rid of what will enable it to do the work of the body and the formation of unhealthy tissues everywhere. The tonic used ought to be one that will clear away the most delicate toxins from the system and the blood. Dr. Williams' Pink Pills do.

Here is a bit of convincing proof given by Mrs. Chas. L. Linder, Elberfeld, Germany: "For some years I was a sufferer from stomach trouble. Everything I ate caused distress, sour stomach and belching. I could not eat meat or potatoes, and I grew weak and very nervous. No medicine seemed to help me until I was persuaded to take Dr. Williams' Pink Pills. I took the pills faithfully for a couple of months, by which time every symptom of the trouble had disappeared, and I have had no return of the slightest symptom of stomach trouble. No wonder I praise Dr. Williams' Pink Pills."

You can get these Pills from any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Peasants and Almshouses

Mr. Jack Prout, an enterprising young farmer near Pontiac in Prairie, has made a venture this year by attempting to grow peas and alfalfa. So far he has succeeded, and expects to have a satisfactory crop. Although he sowed his initial crop last year with good results, he embarked on a larger scale this season, and hopes it may prove a remunerative investment.

Invents New Method of Weaving Cutting of cotton imports into Germany by half may result from a new method of weaving cloth with hemp, invented by the German textile expert, Dr. Gindler. The hemp, it is expected, will replace in part the cotton formerly used in the cloth. There are about 5,000,000 acres of mountain in Germany adapted to the raising of hemp.

There are now twenty women holding seats in the national parliament of Finland.

Canadian Crop Important

Will Be Main Source of Export Supply

For Next Few Months

"Canada's crop will be the main source of export supply until the crops of the Southern Hemisphere come on the market in February, 1926," says a statement issued recently by the Dominion department of agriculture. This prediction is based upon a general survey, in which North American, European, African and Asiatic production receives consideration. Estimates of wheat yields have now been issued by 25 countries, which last year produced 75 per cent. of the world's wheat, excluding Russia. Their total production is now estimated at 2,174,000,000 bushels, as compared with 2,106,000,000 last year and 2,184,000,000, the average of the five years 1919-1923.

Europe will likely have about 200,000,000 bushels of wheat more than last year, and with a good year yield has import requirements will be reduced considerably. On the other hand, the United States crop is 135,000,000 bushels below last year, and the Indian crop is 10,000,000 bushels, or over 10 per cent. less. Very little wheat will be exported from either the United States or India, and the Canadian crop will probably be exporters, but Canada's crop will be the main reliance," says the statement.

A Power of its Own—Dr. Thomas' Electric Balm has the subtle power of its own. All who have used it know this and keep it by them as the most valuable household remedy. Its uses are innumerable and for many years it has been the leading liniment in the world.

The End of Material Things

Says Earth May Not Last More Than Hundred Million Years

The earth may not last more than another hundred million years, but man will live forever, declared Sir Oliver Lodge in an address in England. The spirit of man, he is the only lasting thing in a universe of change, according to the scientific theories of the day, that nothing goes out of existence except material things.

"Mighty forces, of which we have no conception, are going on in space. A constant emerging thing exists in the universe which will outlast the earth. When this earth is disintegrated into its component parts, that force will be at work still, creating universes of a magnitude incomprehensible to the finite mind of man."

Canada Sells Gold Notes

Redeemable at Option of Government on March 1, 1926

The Canadian Government has sold to the Chase Securities Corporation, and Blair and Company, Inc., New York, treasury gold notes of one-year four per cent. bearing gold notes due September, 1926, the proceeds of which are to be used in connection with the retirement of one-year notes amounting to \$50,000,000 maturing September 15, 1925.

The balance of \$20,000,000, it is announced, will be paid out of cash on hand.

The notes are redeemable at the option of the government on March 1, 1926, and thereafter at par and accrued interest, on 30 days notice.

Entitled to First Prize

Six hundred and twenty-two pounds of proud womanhood was the content in the annual fat women's contest at Coey Island, New York, capturing the honors from 137 other contestants. Possessor of the winning poundage is Miss Dollie Marie Jensen, 22 years old of Jersey City. Entrance to the contest she broke the springs of two taxicabs and became so thoroughly lodged in the door of another that 20 minutes were required to extricate her.

Miller's Warm Powders prove their value. They do not cause any distress in the stomach, any pain or grinding, but do their work quickly and painlessly, so that the destruction of the worms is imperceptible. Yet they are thorough, and from the first dose there is improvement in the condition of the sufferer and a cessation of manifestations of internal trouble.

New Liquid Motor Fuel Called

A new liquid motor fuel called carbinol, invented by Maximilian, a Russian, is said to have given test of 100 per cent. higher efficiency than benzine when tested by the French navy.

Buenos Aires Wakes Up

crossed-crowd palace, unknown to the general public, a few weeks ago, has struck Buenos Aires and is spreading rapidly into the interior.

Performing Good Fish

Two gold fish are the stars of a show in Birmingham, England. Large bowl they perform all kinds of tricks. Their stunts have been successful at 150 performances.

Flying Into Matrimony

Swedish Couple Had Ceremony Performed on Board Aeroplane

A young Swedish couple were recently married while flying through the air on board an aeroplane. When the machines carrying a full complement of passengers, had risen to a height of 1,500 ft., an altar was erected in the cabin, before which a Swedish clergyman performed the marriage ceremony, with a lawyer and his wife as witnesses. A wedding breakfast was then served, and the health of the couple drunk in champagne by all the passengers. The clergyman and the lawyer left the machine at Hamburg, but the couple continued their honeymoon trip to Amsterdam.

Final Wheat Pool Payment of Eleven Cents To Be Made

Winnipeg.—Announcement that the final wheat pool payment for the 1924-1925 season will be 11 cents for Number 1 Northern, bringing the total payment for the season to \$1.66 per bushel, was made here by A. J. McPhail, president of the Canadian Co-operative Wheat Producers, the selling agency of the prairie wheat pools.

The announcement was as follows: "The Canadian Co-operative Wheat Producers, who have closed their operations for the 1924-1925 season, announce a final payment of 11 cents for No. 1 Northern, making a total payment for the year of \$1.66 per bushel, basis Fort William and Vancouver."

"Settlements on other grades are being made in accordance with actual selling spread."

"The provincial pools will receive this net payment, all central administration costs having been deducted and country and terminal charges met."

May Appeal Grain Rate

Lowering of Westbound Grain Rates May Result in Litigation

Winnipeg.—"Senseless litigation" is likely to result from the action of the railway commission in lowering westbound grain rates to the level set by the Crows' Nest agreement, stated H. J. Symington, K.C., freight rates counsel for the prairie provinces. The unprecedented action of the commission in declaring valid a decision, against a majority of its own members, will, in all likelihood, be appealed by the railways as a ground for appeal, in Mr. Symington's opinion.

Hon. R. W. Currier, attorney-general for Manitoba, stated that the commission is concerned, the province is not affected, except insofar as the volume of grain passing through is diverted through western channels. Continuing, he says:

"The hearing of the case was in Vancouver, and British Columbia and Alberta are most vitally interested. It is not clear on the effect of an order given by two members of the commission in the face of dissenting opinions of three others. In view of the dissenting opinion, it would appear likely that the order might be appealed by the railway companies."

Veteran Newspaperman Passes
Saskatoon.—The death of George E. Nelson, veteran newspaperman of Saskatoon, took place at St. Paul's Hospital, Saskatoon, after a brief illness. Mr. Nelson had reached the age of 55 years, and was one of the most successful newspaper men in Saskatchewan, before going to England in 1906. He had been associated with his father in the newspaper business in Armbrist, Ont.

News Of Escaped Prince
London.—Prince Sel, Prince of Egypt, who recently escaped from Scotland Yard, and is now out of the country, it is learned, recrossed the channel, was met at Boulogne by his mother, immediately entered an automobile and was driven toward London, and the south. Reports are that the party is enroute to Southampton, where the mother has large estates.

"Dug" Kills French Farmer
Amiens, France.—The "Dug" of the Great War still remains a deadly menace. Jean Roy, a farmer of Boulogne, was under heavy fire by the German guns during the period of hostilities, was blown to pieces by a shell which had fallen without exploding and was buried in the earth. He struck it while digging a stake into the ground.

Freight Rate Ruling To Be Of Great Benefit To Trade In The West

Vancouver.—The grain trade, and business interests in general, along with those who had been clamoring for the elimination of the differential rates between the prairie and British Columbia, have expressed great satisfaction with the order of the railway commission and predictions of early development of industrial and shipping channels of the Canadian Pacific coast were made.

The ruling will mean that the rate from Calgary to Vancouver on grain shipments will be 10 1/2 cents a bushel, compared with the present scale of 12 1/2 cents a bushel. The rate from Cal-

Extend Letter Rate To Wider Area

Additional Countries Are Included in Three Cent Postage

Montreal.—The post office weekly bulletins issued from Ottawa on August 25, gives the following information relative to letter postage to North American continent: From the first of September, the domestic letter rate of three cents for the first ounce and two cents additional for each subsequent ounce will be in effect as regards letters mailed in Canada to any part of the North American continent.

This rate already applies to letters for the United States, Mexico and the British West Indies, and as already announced, also comes into effect as regards letters for Newfoundland from the first of September. With the further extension mentioned above, it will apply from the first of September not only to the following additional countries: Costa Rica, Cuba, Dominican Republic, Dutch West Indies, Ecuador, El Salvador, Guatemala, Haiti, Honduras, Republic, Nicaragua, Panama, Republic, Salvador and St. Pierre and Miquelon.

Noted Scientist Dies In Africa

Professor Cutler, of Manitoba University, Victim of Malaria

Winnipeg.—Professor W. H. Cutler, of the University of Manitoba, who was leading a scientific expedition party in Africa in search of the source of a large disease-causing reptile, died Sept. 2, according to advices received here.

Professor Cutler, assistant in the department of geology of the University of Manitoba, left Winnipeg January 10, 1924, to head the British Museum's party of explorers to Africa. He was considered one of the best authorities on Western Canadian geological history, and the expert of the University of Manitoba, had made extensive surveys of the formation of solid rock in both Manitoba and Saskatchewan.

He had discovered many relics of the day before the first white man set foot in the prairie country, and it had been his intention to compile a history of the natural formations of the country.

Prof. Cutler was born in London, Eng. 42 years ago.

He was unmarried.

Rome Is Insolvent

Once Ruled World, Cannot Pay Costs Of Administration Now

Rome.—The Eternal City, which for centuries ruled the world, now even loses its rights to city administration. Its insolvent financial condition compelled the government to take action, and the cabinet decided to adopt the city, so the taxpayers throughout the country were contributing to the support of the capital. Although taxes in Rome have been higher than in any city in Italy, it has been unable to pay the costs of administration. The administration is now under the minister of the interior, who appoints a governor.

Auto Fatalities in States
Washington.—Three hundred and twenty-eight persons were killed in automobile accidents in a group of 57 cities in the United States during the week ending August 15. There were 437 fatal deaths the preceding four weeks.

gary to Fort William is 15 1/2 cents a bushel. G. M. McCreedy, K.C., who has been coming for the British Columbia government in its fight for equalization, predicted that "western grain shipments this year should amount to 150,000,000 bushels, and also that Vancouver and other sister Pacific Coast ports henceforth will handle the whole of British Columbia's export crop and about half of Saskatchewan's."

Mr. McCreedy also forecast great business developments and the need for harbor and additional elevators and other improvements to handle the increased grain movement.

Favor Ban On Narcotics

Trades and Labor Council Would Prohibit Manufacture Except For Medicine

Ottawa.—The trades and labor congress was on record favoring the complete prohibition of the sale and manufacture of narcotic drugs except for medical purposes.

The motion was the occasion for a brief criticism of the British Government. T. Mack, of Toronto, declared that the British government was largely responsible for the opium traffic of the world today because of its unwillingness to ban the traffic and should be subject to severe censure.

James MacDonald, Toronto, said if one country more than another was responsible for the opium trade, it was the British empire. There was no such thing as a harm community of nations, he said.

Bert Morgan, Toronto, declared that the British empire alone was not responsible for the manufacture and speedy suppression of the industry would cause Germany and other countries to manufacture the manufacture of deadly substances. British was open to criticism as were other nations, and the congress should be on record as opposed to the traffic, which was one of the greatest menaces to public health.

Great Sight For Prince

Forty-six Thousand Argentine Cattle Assembled in One Place

Concordia, Argentina.—Forty-six thousand cattle assembled in one place for the benefit of a son of the British prince, was one of the sights seen by the Prince of Wales in his tour of Argentina and his visits to some of the great estates.

Crowds greeted the Prince everywhere and at any hour of the night there were heard as his train passed through the small stations.

The Prince started his trans-continental tour to Chile in a luxurious special train.

Seven hundred miles across the Argentine pampas brought him to Mendoza, Sept. 6.

King Tut Again

Body of Famous Egyptian King to Be Exhumed in October

London.—Howard H. Carter, discoverer of Tutankhamen's tomb, announced that the body of the king would be exhumed next October. He said he believed King Tut will be found to have been only 15 or 16 years old. The body will be exhumed without removing it from the tomb and at a time when there is no serious crowd. Carter added that he found numerous little plastic and fragrant in a cosmetic jar in the tomb, and experts in London are analyzing them with the hope of producing for modern women cosmetics like those used by Egyptians 3,500 years ago.

Ancient Escutcheon Back In Quebec

Hon. P. C. Larkin Brings Relic Returned By People Of Hastings, England

Quebec.—The Hon. P. C. Larkin, Minister of the Interior, brought back to Quebec a relic of the French regime, which was the possession of the city of Hastings, England, and some time ago negotiated were stored with a view to its restoration which resulted in its return.

The escutcheon measures four feet high and three feet wide, and is beautifully carved and painted. Mr. Larkin has had constructed a mahogany case for the shield and during its journey across the Atlantic it has been carefully stored in a room specially provided on the Megantic.

1759, after the capture of that city by Wolfe, and was taken to England by General Murray. Since that time this relic of the French regime has been in the possession of the city of Hastings, England, and some time ago negotiated were stored with a view to its restoration which resulted in its return.

The escutcheon measures four feet high and three feet wide, and is beautifully carved and painted. Mr. Larkin has had constructed a mahogany case for the shield and during its journey across the Atlantic it has been carefully stored in a room specially provided on the Megantic.

At Imperial Press Conference

Delegates Welcomed to Australia By Premier Bruce

Sydney, Australia.—The Empire Press delegates to the Imperial Press conference at Melbourne, who visited New Zealand on their way to Australia, arrived here after a somewhat stormy voyage from New Zealand. They were welcomed by Premier Bruce of the Australian Commonwealth.

Premier Bruce described the coming Imperial Press conference as the unofficial parliament of the British Commonwealth of nations.

"The fuller knowledge resulting from the interchange of ideas," Premier Bruce said, "will enable the press conference to make a valuable contribution to the solution of empire problems. The delegates have at their responsible command potent instruments for moulding and directing public opinion, and have as an audience the whole people of the empire."

Monster U.S. Dirigible Shenandoah Wrecked With Heavy Loss Of Life

British Wait Decision On Mosul Boundary

Secretary of Foreign Affairs Says Question Contains War Menace

London.—Austin Chamberlain, British secretary of foreign affairs, has gone to Geneva to attend to the League of Nations council assembly, which is faced with two principal problems—the Mosul question and European security.

The league's decision on the report of the Mosul boundary commission is awaited with keen interest in official British circles. The London Star, an evening newspaper, warns of the danger of war over Mosul if the Turks decide to fight Great Britain for possession of Mosul Vilayet, but the well-informed circles believe this view to be unfounded and expect a satisfactory settlement at Geneva.

Would Copy British Method

Says U. S. Law Procedure Is Product of Crime

Detroit, Mich.—Codification of international law, an appraisal of English procedure, and an address on liberty and law, offered a programme of diversified appeal to the 2,000 delegates attending the first sessions of the American Bar Association.

The system of criminal procedure in United States courts is so protective of the accused that it is a big factor in crime production, Chancellor H. S. Hadley, of Washington University, told the criminal law section. Appointments of criminals and infliction of adequate punishment are as much as 90 per cent inefficient, Mr. Hadley said.

Trade Agreement Ratified

Australian Government Has Passed Commercial Pact With Canada

Melbourne, Australia.—The commercial trade agreement between Canada and Australia has been ratified by the Australian Senate.

The agreement, as recently amended, which provides that before imports entering Australia are entitled to the preferential tariff, they must be seventy-five per cent of British material and labor, instead of only twenty per cent. British, as was the case under the old regulation of the Commonwealth, was endorsed by the House of Representatives, a vote of 100 to 10.

The ratification of the agreement was made by J. McKenna, Australian minister of trade and customs.

Investigating Canton Embargo

Vancouver.—The Canton embargo against British vessels is receiving the serious attention of the British and Canadian governments and other governments affected, according to a telegram received by the Vancouver Free Press and Commercial from the British Consul in Canton, China, dated August 26.

Western Stock For Toronto Fair
Montreal.—The Toronto stock exchange, which will be held at the Canadian National exhibition at Toronto to demonstrate to the eastern feeders the quality of the stock raised in Saskatchewan. The purchase was made by Jack Dyer, Dominion live stock representative.

British Teachers Tour Canada

Toronto.—Sixty-five education authorities and members of the teaching profession from the public and secondary schools of Great Britain, who are touring the Dominion under the auspices of the Overseas Education League, have reached here.

Believe "Red" Influence Is Behind Disturbance In British Shipping

Montreal.—Behind the world-wide disturbance in British shipping is the "Red" influence, asserted J. Haycock, Union president of the British Red Cross Society. However, the influence of the Communists are falling and will continue to fall, he added. As proof of the weakness of the "Reds," Mr. Haycock pointed to the sailing of the Majestic from Southampton on schedule, and the progress toward normal operation made by other ships in British ports.

Radio news cabled by Communists to Australia had provoked the strike men's strike there, said Mr. Wilson. In Britain, the "Reds" had taken advantage of the reduction in pay to bolster up their own "daring organization," and had worked on the feelings of the sober-minded worker.

The "Reds" will all be over soon," he added, and proposed a warm line for the agitators when the seafarers who have heeded them find they have been misled. "I don't know," he said, "but I have heard that the Reds have made as regards strike money, but if they have promised any, they will have to deliver the goods or run for their lives."

The 100,000 members of his union, he said, would live up their contract and stick to their jobs.

W. N. U. 1092

Caldwell, Ohio.—Fourteen of the crew of the Shenandoah, giant dirigible, are dead, and two others were injured in the explosion of the ship of the United States navy crashed during a severe storm on its western cruise from its Lakehurst, N.J., air port. Among the dead is Lieutenant Commander Zachary Lansdowne, captain of the ship.

After settling the elements for several hours, the huge airship suddenly shot upward to an altitude of approximately 7,000 feet from a 3,000-foot level, where the dirigible buckled amidships. The pressure and twisting was so great that it broke the ship in three sections.

The central cabin, sinking beneath the fore-section of the ship proper, broke away, and crashed to the ground below at an altitude of several thousand feet. It carried most of the crew who were killed.

Released of the central cabin, the fore-section, measuring about 15 feet, and bearing seven survivors, free-balloon for more than an hour and finally was landed near a farmstead from where the central cabin crashed, near Avea.

Want Seasonal Rate For Alberta Coal

Government to Consider Question of Special Rate on Shipments

Edmonton.—Premier Greenfield's request to Hon. Mackenzie King for a supplementary order-in-council authorizing a special inquiry into seasonal rates on coal shipments, is to be supplemented by a supplementary cabinet meeting as soon as the ministers can get together. Word to this effect has just been received from the prime minister.

In the meantime, Premier Greenfield points out that the press reports from Toronto that Premier Ferguson is represented as joining with Alberta in an effort to secure an extension of the time and quantity for this year's coal shipments, are somewhat off the track. His wire to the Ontario Premier was simply a request for co-operation in the Ottawa asking for an order directing the railway commission to investigate the coal problem, which Premier Ferguson is represented as joining with Alberta in an effort to secure an extension of the time and quantity for this year's coal shipments, are somewhat off the track. Losing Stamina And Fibre

Says Ease of Present Day Living Leads to Moral and Physical Degeneration

An eminent New York preacher recently charged that "the ease of present day living is responsible for physical and moral degeneration in man-kind," and there is proof of something in the diagnosis. To the extent that men and women are enabled to live without strenuous effort they are likely to lose in stamina and fibre. But have we reached that stage? Rev. O. T. Olin says we have. Our fathers were mighty and rugged, he argues, because "they were up against forces that made for strength, that continually tested and tempered their metal." He continues:

"We know almost nothing of such hardships, and our softness is absolutely tragic. The factors that made for character with our fathers are almost all gone from our lives. And it is telling on us. We have too much wealth, complacencies, and ease. We give an easy job, flabby weakness. They want every control of so that the sky may be the limit to their expression of every desire, regardless of results—just to they are not interfered with. And strength of character is conspicuously absent."

This is a strong indictment, and much evidence could be adduced in support of it. But it is too sweeping. It has its application almost wholly to sons of the rich, and not even to all of them. In the place of the hardships which nature and unavoidable limitations cast upon our grandfathers, and in some degree also on our fathers, we have found substitutes, effort which comes from competition. There are more and richer prizes to be won today than fifty years ago, or even twenty-five years ago. The young men will go to the young men who work for them. In that struggle there is the appeal to both body and mind, and courage which taps very largely to keep up the strength of the race.—The Ottawa Journal.

Fish That Is Good Marksmen

Totote Shoots Water at Insects It Wishes to Destroy

The totote, a fish that is well known to travellers in the islands of Malaya, is an expert marksman. It feeds upon insects. Swimming quietly along the banks it watches all the plants on the river, and when it finds one with many insects upon its leaves or branches it swims up close, fills its gills with water, takes accurate aim and shoots the water with force at the insects. Its aim is absolutely accurate and the water jet never misses its object. It kills the insects and swallows them into the water so that the totote may devour them. The bandito, a large fish found on the Mediterranean shores of Africa, covers itself with mud, raises a small flag like appendage of its lips and quietly awaits the inquisitiveness of smaller fish that mistake the mud for food. When a number of these small fish assemble around the flag the bandito opens its large mouth and swallows them.

How Word "Tip" Originated

Derived From Ancient Word Meaning To Touch Lightly

Tip is derived from an ancient word which meant to touch lightly. So it conveyed the idea of security, and in time became applied to the little paper present which we call now a tip. Practically the same term is understood in the "tip" of the racecourse, the essence of which is that it is at least supposed to be given secretly. The popular explanation is, however, far different, and the story has been told of the hotel boy marked "To Give Prominence," who, in the course of which was regularly shared out amongst the employees. This word, the story runs, time, became shortened to the initial, and finally to the new word of tip. Ingenious though this explanation is, the less interesting origin from an ancient word for touching lightly and secretly is in all probability the correct one.

Believes Chinese Invented Locks

It is said the Chinese understood canal building at a very early period. They are believed to have been the first to invent locks to raise vessels from one water level to another. Recently canal locks were being constructed in China at least 1,000 years before the Christian era. In Europe there is doubt whether it was the Dutch or the Italians who first used locks on canals.

Taking No Chances

A placard in a hotel at Parkersburg, W. Va., reads: "Tourists undertaking to climb the higher mountain peaks are respectively responsible for settling their accounts in advance."

Find Transparent Fish

Deep Sea Scientists Discover Marvels On Ocean's Bed

As more and more of the remarkable finds of the Arcturion party of deep sea scientists are made public, Jules Verne becomes more and more of a tyro.

The Arcturion arrived at this port with Dr. William Beebe on the bridge, and straightway there were finds of surpassing marvels dredged up from the bed of the ocean.

Not the least of these was a fish which carries a transparent plate over its stomach. The spectator, looking through the plate, can see the workings of all the vital organs of the strange bit of life. The expedition brought back interesting data about the 120-fathom water off of what was once the Hudson River, 100 miles out of New York.

This material has been known to the scientists for a long while, but the Beebe expedition has established that the sea life there contains many hitherto unknown specimens.

Fish with complete lighting systems of their own, developed to make it possible for them to live in the darkness below the waves, were among the valuable finds.

Concerning the Hudson waterfalls, Beebe said: "The old river bed is plainly marked on the ocean bottom. The cliff rises for them to rise in the darkness of 520 feet, greater than any river waterfall on earth. We dredged about the foot of the cliff within 100 miles of the City Hall and found a rich deep sea life."

Several brightly lighted fish were taken up from the bottom of the ocean. One of these was a white light fish that exists at the mouth of the Hudson. Fish that are thought to belong to hitherto undiscovered species were dredged from the bottom of the extinct waterfalls. Asked what was the most remarkable thing he saw tonight in the white light fish, Dr. Beebe said: "We found many surprising things. But the last one to be found always struck us as the most remarkable."

Inflation Period Affected Health

German Children Were Undernourished Says Minister of Interior

That the period of inflation was directly responsible for the retrogression of public health conditions in Germany, was maintained by Dr. Bebel, the minister of the interior. In a speech before the Reichstag, he declared that the marked improvement of the prevailing conditions of health noticeable a few years after the war was completely undone by the inflation period of 1923. Especially a spread of constitutional diseases, like tuberculosis and rickets, was recorded.

The number of undernourished and anemic children increased to an alarming degree as the inflation progressed. Shortly after the stabilization of the country's currency, a very pronounced retrogression in general health conditions became apparent. The death rate of 1924 and the early part of this year has been surprisingly low, lower in fact than ever before in peace times, or, for that matter, in any other country. Today the mortality from tuberculosis in Germany is lower than ever before.

But for all that, declared Dr. Bebel, the number of children with tuberculosis and rickets is far too great. He described how the government was striving incessantly to improve health conditions among the children of the poorer classes by means of sanitary control and instruction in the schools, but especially with the aid of numerous exhibitions of hygiene and demography throughout the country.

Ship Horses To Europe

A policy, designed to open up new markets for Canadian horse breeders, has been inaugurated by the Dominion department of agriculture. The government has collected 80 head of horses, and will ship them to Europe, where there is a good market, according to present reports. All charges will be paid by the department; records will be kept, and when the horses have been sold it will be known exactly what profit, if any, was made. It is years since there has been any export trade in horses. Such matters as ocean rates and landing permits have to be arranged.

Planes Gather Mail in Flight

Mail bags are pulled aboard with a grapple without halting the planes at stop points on a German air mail line. A plane is attached to a rope suspended between two poles in an open field. The pilot flies under the up-ribs and as the plane passes past the anchor, which already has been dropped, catches the cross rope and the pouch, which from the ground, is pulled up to the plane and the mail is delivered to higher levels—Popular Mechanics.

There are 511 newspapers in Cuba, or 233 to each 1,000,000 inhabitants.

A Scientific Production

Making Tennis Balls Is a Slow Particular Process

The tennis ball of today is a scientific production, the perfect cover requiring 10 years to perfect it. A tennis ball has not only to pass tests of weight and size, but a bounce test as well. Dropped from a height of 100 inches on to a concrete platform, it must not rebound more than 60 or less than 50 inches. The rubber cover of a tennis ball is made in moulds in two separate halves, and then has to be vulcanized, or "cured," to a point of certainty which, measured by time, is but a second. The two halves are joined during the vulcanizing process.

The next step in the inflation, an operation demanding great skill. It is done through a "needle hole," which is sealed when the exact degree of inflation has been attained. Thereafter the rubber cover is complete! The cover of a stitched ball is, of course, put on like a glove, and then sewn. No secret about that!

Fighting Disease With Disease

Treatment Is Said To Have Been Successfully Tried

That paralysis may be cured by forcing the sufferer with malaria fever was the belief expressed at a recent medical convention. The treatment, in which one disease is made to cure another, is said to have been tried with success. Blood taken from a malarial patient is injected into the veins of the paralytic who then he attacks of high fever. After eight or ten of these attacks, the patient is given quinine to kill the malarial germs which killed the paralysis bacilli. Popular Mechanics.

Lands Deeded Free

Up to 10,000 acres of Kootenay flats lands will be deeded free of cost to any persons or syndicates who will undertake its reclamation on the drainage district plan, and who will sell such portions as it may be deeded to dispose of at a price that will assure of the acreage reclaimed being put under crop. This is the announcement by Hon. T. D. Pattullo, minister of lands for British Columbia.

A critic is a man who sits on the fence and howls because the world isn't as wise as he feels.

New Continent Is Rising In Pacific

Land Is Being Built Up Near Hawaiian Islands

Edwin Falraux Naunty, geophysicist, of New York, who has made a study of the oceanography of the seven seas, writes the following remarkable statements:

"Land waves on the bottom of the Pacific Ocean, caused, perhaps, by a slipping northward of the great Antarctic Polar ice cap and fortified by seismic pressure from the American coasts of the Pacific Ocean, from the Japanese Archipelago, from Alaska and the Aleutian Islands, breaking, at last, on the deep foundations of the Hawaiian Archipelago, have built up the shoulder shoals surrounding the Hawaiian Islands and seem now to be creating new land on the seafloor connecting the various islands and shoals of the Hawaiian."

"We expected upstart of land, which is likely to come in this generation, will present as a gift of nature to the United States a territory in the mid-Pacific as long as from San Diego, Cal., to Queen Charlotte Sound, British Columbia, and as wide as California, as long as from the tip of Florida to Boston, Mass. It would be a tremendous strategic advantage to the nation holding it as a productive and trade base and would grow enough sugar, rubber, coffee, and tea to render the United States independent of foreign sources of these articles."

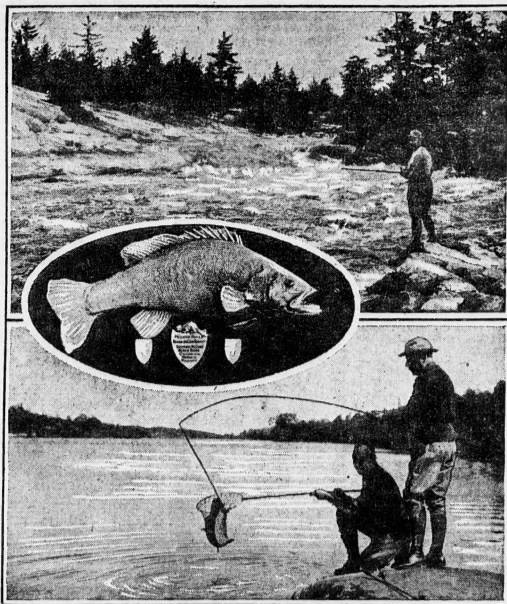

Only Attempted One

"How did you get on at your arithmetic examination?"
"Very well, father!"
"If my sums did you have wrong?"
"Only one!"
"Good. How many were there?"
"Twelve!"
"Fine. And the other eleven were all right?"
"Oh, no. I didn't do them."

In the summer, herds of muskoxen graze in flower-filled valleys of Ellesmere Island, the second nearest island to the North Pole.

A species of snail has been known to live without food for a year and a half.

French River Has Record Fishing Season

(Upper) Five Finger boats, French River. (Lower) Netting the fisher of French River. (Inset) The trophy snail from the river. (Inset) The trophy snail from the river. (Inset) The trophy snail from the river.

The French River, district in Northern Ontario where the Canadian Pacific Railway operates a bangsal camp is reported to be having the record season for fishing it has ever experienced. For excellence of sport and size of fish, the present summer is easily beating over the palm.

This is accomplished when it is stated that during a short stay of one party

of anglers, in the French River district in July, seventeen muscogons were taken of which the top weight was 23 pounds, and the catch also included half weighing 31 lb., 26 lb., 24 lb. and four others weighing between 22 and 15 pounds.

The Dr. Sullister party of six people from Cleveland reared a catch of 48 fish in one day, while the rest of the party hooked four muscogons.

Tribute to Canadian Teachers

Make Favorable Impression and Are Popular With Pupils

"As an empire, we mean a great deal to the world, standing as we do for culture, progress and justice, but unless our people keep together and know one another they cannot give their greatest service to the world."

This was the sentiment expressed by Mrs. Ord Marshall, C.B.E., in an interview, when she discussed the aims of the League of Empire of Great Britain, an organization, which she has served as honorary secretary for 21 years. Mrs. Marshall is spending a few days in Toronto, having accompanied a group of 50 English teachers on a trip to Canada.

In reference to the exchange of teachers, Mrs. Marshall spoke of the favorable impression made by Canadians in England. "They adapt themselves in a very remarkable way," she said, "and seem so desirous of getting all the benefit they can. Their work is excellent, and they have such a sense of responsibility. They are very popular, and make friends easily with both our principals and teachers."

Heat Affects Mental Efficiency

Mistakes Made When Temperature Climbs Above Seventy Degrees

From experiments carried out by a famous psychologist, he proved that mental efficiency is lowered, and more mistakes are made, when the temperature rises above 70 degrees. As a school becomes a real "sweater," natural inclination to toil, mental or otherwise, becomes steadily lower, and when the temperature is 80 degrees in the shade mistakes increase by 60 per cent. With these figures to help one it need not be difficult to impress on an employer that a day of rest is safer all round in the hot weather.

A forerunner of the famous trench penicillin was the "hypercone," which was invented by Francis Galton for his personal comfort in seeing over people's heads at the theatre and in crowds.

"Don't ever borrow money from him," he said. "He wants 50 per cent. in winter and 60 in summer."

"Why more in summer?"
"Because the days are longer."

Natural Resources Bulletin

Canada Has Need For Patriotic Teachers to Inspire Progress Ideas Regarding This Dominion

The natural resources intelligence service of the department of the interior at Ottawa, says:

With the opening of the autumn term of the schools the pupils will be again settled down to study. What this study shall be and its effect upon the after-lives of these coming Canadian men and women will depend largely upon the teachers. A set curriculum is established by the provincial educational authorities which must be followed, but these regulations cannot and are not intended to eliminate individuality entirely. We can all look back upon our school courses, whether primary or secondary, and pick out the particularly bright spots, where some of our teachers made their personality felt, in the teaching of a subject. There is no more reason why some of our teachers more latitude is possible, than that of Canada. Canadian history, Canadian geography, Canadian natural resources and their development are subjects interesting to the teacher who is one hundred per cent. Canadian and such subjects are of the greatest importance with the magnitude of the wonderful heritage that is theirs as young Canadians.

Canada needs to be better known, at home as well as abroad, and our own people do as much to place her advantage, where some of our teachers make their personality felt, in the teaching of a subject. There is no more reason why some of our teachers more latitude is possible, than that of Canada. Canadian history, Canadian geography, Canadian natural resources and their development are subjects interesting to the teacher who is one hundred per cent. Canadian and such subjects are of the greatest importance with the magnitude of the wonderful heritage that is theirs as young Canadians.

Canada needs to be better known, at home as well as abroad, and our own people do as much to place her advantage, where some of our teachers make their personality felt, in the teaching of a subject. There is no more reason why some of our teachers more latitude is possible, than that of Canada. Canadian history, Canadian geography, Canadian natural resources and their development are subjects interesting to the teacher who is one hundred per cent. Canadian and such subjects are of the greatest importance with the magnitude of the wonderful heritage that is theirs as young Canadians.

The natural resources intelligence service of the department of the interior will study forward to teachers maps and literature on Canada that are available, and that in presenting a true Canadian spirit among their classes.

Cannot Collect For Professional Applause

Organized Hand-Clappers Decide Says Vienna Judge

Organized applause constitutes a desecration of the public, in the opinion of a Vienna judge. Persons engaged to do the hand-clapping and to voice their applause in other ways cannot claim remuneration. The judge recently ruled on a dispute between Dr. Stefan, composer of a comic opera, entitled "Agni," and the leader of a clique at the Burgtheater, where the first performance of "Agni" was given. The leader claimed that the composer had agreed to employ the first performance of "Agni" and the hand-clappers had rendered a manual service worth 500,000 crowns.

The judge decided to hear just what the arrangement between the two men was, and rendered judgment against the chief of the clappers on the ground that the activity in question constitutes a fraud upon the public, and that it is "immoral."

History of the Match

Was First Introduced in England 100 Years Ago

The match recently had its 100th birthday, having been introduced in 1825 by John Walker, an Englishman, who conceived the idea of selling his matches at 1 shilling 4 pence a box. The safety match, called "Swedish" did not appear until the year 1828. This was the first match, which could be lit only when struck on the box. The idea of the match, however, antedated Walker by nearly two centuries. As early as 1680, Galley Hensley was using phosphorus to ignite light wooden sticks dipped in sulphur. Various attempts were made by other scientists of the day, but it was not until 1825 that the match emerged from the laboratory and was placed on the market.—Indianapolis News.

The English Of It

This is probably why the English language is so hard for foreigners to learn:

"I've lost the links," said the soldier, who "lost the links," said the soldier, as he wandered aimlessly through the woods.

"I've lost the lynx," said the hunter, as he saw the tracks around his trap.

In Cipher

Cashier, after reading the suave gentleman's check: "Be your pardon, sir, but what's your name?"

Stay. What's the idea? Can't you say 'what's your name' as you see my signature on the check?"

"Sure I do. That's what made me curious."

BAREE, SON OF KAZAN
James Oliver Curwood

A LOVE EPIC OF THE FAR NORTH

Copyright, 1917, by Doubleday, Page & Co.

"BAREE, SON OF KAZAN," a Vitaphone Picture, With Wolf, the War Dog, is an Adaptation of This Story

SYNOPSIS

Barée, the young wolf-dog, wandering in the wilderness, came upon a colony of beavers. He befriended them, and with them, their leader, but the little animals were not from him, leaving Barée lonely and unhappy. He was attracted by the moaning of the moose and the yapping of a fox, but he was called by the wolf-dog to the chase, the hunt, the life of a dog of the forest and running blood.

CHAPTER VII.—Continued.

For a quarter of an hour Barée waited him, while he knicked fish out of the pool. When at last he stopped, there were twenty or thirty fish among the stones, some of which he did not eat. From where he lay flattened out between the two rocks, Barée could hear the croaking of fish and the splashing of water, but he did not move. He heard the big bear, the moose, and the fresh smell of fish filled him with a craving that had never been roused by crayfish or even partridge.

Twenty seconds after the last of Wakayoo had disappeared, a tail of the creek, Barée was under the broken balsam. He dragged out a fish that was still alive. He ate the whole of it, and it was delicious.

Barée now found that Wakayoo had solved the food problem for him, and this day he did not starve. He was a bear, now, the next. The big bear was incessantly fishing up and down the creek, and day after day Barée continued his feast.

For a week life continued to be exceedingly pleasant. And then came the break—the change that was destined to mean as much for Barée as that other day, long ago, when he killed the man-brute in the edge of the wilderness.

This change came on the day when, lying on a rock, half the creek, Barée found himself face to face with Pierrot, the hunter, and Nepeese, the star-eyed girl who had shot him in the edge of the clearing.

It was Nepeese whom he saw first. It had been Pierrot who would have turned back quickly, but Nepeese, with blood of his forehead was running strange tremblings within him. Was it like this that the first woman had looked to Kanan?

Barée stood still. Nepeese was not more than twenty feet from him. She was on a rock, half the creek, Barée found himself face to face with Pierrot, the hunter, and Nepeese, the star-eyed girl who had shot him in the edge of the clearing.

Want Canadian Governor-General

Vancouver Native Sons of Canada Favor Candidate for Post

The Vancouver Assembly, Native Sons of Canada, went on record as favoring the appointment of a Canadian to the office of governor-general. Sir James Aikman, Sir Robert Borden, Sir William Mulock, Hon. Arthur Currie, Sir Arthur Currie, Sir Lomer Gouin, and Sir Hon. W. S. Fielding, were suggested as suitable for the position.

Barée was panting and laughing. Pierrot came back wildly, and the Willow pointed beyond him.

"I had him—and he didn't bite!" she said, breathing swiftly. She still pointed to the end of the canyon, and she said again, "I had him—and he didn't bite me, Nootwa!"

That was the wonder of it. She had been reckless—and Pierrot had bitten her! It was then, with her eyes shining at Pierrot, and the smile fading slowly from her lips, that she spoke the word "Barée" which in her tongue meant "the wild dog!"

A little brother of the wolf. In and out among the rocks Barée sought swiftly for a way of escape. In a moment more he had come to the "bore," or cup of the canyon. This was a break in the wall, fifty or six feet wide, which opened into a natural prison about an acre in extent. It was a beautiful spot. On all sides but that leading into the cone it was shut in by walls of rock. At the end of a waterfall broke down in a series of rock steps. The grass was thick underfoot, and strewn with flowers. In this trap Pierrot had come more than one time hunting for Barée. From there was no escape, except in the face of his rifle. He called to Nepeese as he saw Barée entering, and together they climbed the slope.

Barée had almost reached the edge of the cone when he saw Pierrot suddenly he stopped himself so quickly that he fell back on his haunches, and his heart jumped up into his throat.

Full in his path stood Wakayoo, the huge black bear!

Barée slipped to one side and ran for the open meadow. Wakayoo did not stir as Barée sped past him—no more than if he had been a bird or a rabbit. Then came another breath of air, heavy with the scent of man. This, at last, put life into him. He turned and began lurching after Barée, on the meadow track. Barée, looking back, saw him coming—and thought it was pursuit. Nepeese and Pierrot came over the slope, and at the same instant they saw both Wakayoo and Barée.

Where they entered into the grassy dip under the rock walls, Barée turned sharply to the right. Here was a great boulder, one end of it lifted up the earth. It looked like a splendor of hiding place, and Barée crawled under it.

But Wakayoo kept straight ahead into the meadow.

(To be continued)

Nearly all children are subject to worms, and many are born with them. Spare them suffering by using Mother's Worm Expeller, an excellent remedy.

Guested Right

A crowd of small boys was gathered about the entrance to a circus tent. A signpost was watching them for a few minutes. Then he walked up to the ticket collector and said with an air of authority:

"Let all these boys in and count them as they pass."

The ticket collector did as requested, and when the last one had passed in he turned and said: "Twenty-eight, sir."

"Good," said the man, smiling, and he walked away. "I thought I guessed right!"—Los Angeles Times.

But poison and truss cause an expenditure of two million dollars annually in the United States.

Cuticura Baths Comfort Baby's Skin

The absolute purity and delicate modification of Cuticura Soap make it ideal for baby's tender skin. Used daily, with touches of Ointment to little skin troubles, it keeps the skin smooth, clear and healthy. Cuticura Soap is soothing and cooling, ideal for baby after a bath.

Comet Had Several Tails

Six Diverged From Head of One Discovered in 1741

It is reported from Germany that photographs taken of the comet Orion last night show a second tail. This tail cannot be seen with a telescope. The primary tail also, is at intervals and purposes, merely a photographic object, and the vaguest indications of it being perceptible in a telescope. A difficulty, or even a multiplicity, of tails is a common occurrence, although it is not often seen in objects so faint as the present comet. The great comet of 1744, discovered by the Klinkenberg, had six tails diverging like the ribs of a fan from its head. In some comets the tails are curved, in others they are straight, while often curved and straight tails exist together.

**KEEP BABY WELL
DURING HOT WEATHER**

Every mother knows how fatal the hot summer months are to small babies. Colic, indigestion, diarrhoea, dysentery, colds and stomach troubles are rife at this time and often a precious little life is lost after only a few hours' illness. The mother who keeps baby's own Tablets in the house for such an emergency is always prepared.

The occasional use of the Tablets will bring the baby safely through. They are sold by all druggists or will be sent by mail on receipt of the price. The Tablets are in the form of a small, round, white pill, and are sold by Dr. Williams' Medical and Surgical Co., New York, N.Y., under the name of "Care of the Baby in Health and Sickness," will be sent free to any mother on request.

Not All Friendliness

Famous Author's Concern For Young Beginner Included Himself

A famous author and an ambitious beginner arrived together at a small hotel. On the second day of their stay the author took the waiter aside, and said: "I want to talk to you about my young friend of mine. He is now in this writing game, and makes his money by writing books. I want you to write him a letter, telling him that his bill as possible."

The landlady, startled at the great man's sudden attitude, promised to do as requested, until the author added: "By the way, don't let my bill be any higher than his. It would humiliate him. Boys like that are extremely touchy."

Internally and Externally it is Good.

The crowning property of Dr. Thomas' Electric Oil is that it can be used internally for many complaints as well as externally. For sore throat, cough, whooping cough, the pain in the chest, colic and many kindred ailments it has qualities that are unapproachable. A bottle of it costs little, and there is no loss in always having it.

Cure For Social Cancers

Better Discipline and Higher Ideals For the Youth of the Land

We are convinced that the best cure for most of our social troubles is to be applied in the childhood of the nation, in the formation of self-discipline, self-reliance, right thinking and the acquiring of ideas and standards of conduct. In the Boy Scouts under good masters is one of the best counter agents to evil influences.

A little girl, on arriving late at school on a Wednesday, was scolded by her teacher and told to write a composition on "Punctuality."

After a strenuous quarter of an hour she produced the following:

"Punctuality is knowing where to make stops."

Minard's Liniment for Diarrhoea

After a strenuous quarter of an hour she produced the following:

Minard's Liniment for Diarrhoea

A Canadian Explorer

Major Burwash Starts on a Long Patrol of Northern Points in Canada

When Amundsen made his spectacular flight to the North Pole, to some point in its vicinity, the whole world was interested. When the McMillan expedition, thoroughly equipped and equipped in every way for its work of Arctic exploration set out, every line of news about the trip is featured in the press of the world.

Less is heard about the trip a Canadian is making into the far north. The magazine published by the interior department at Ottawa gives some particulars about the little advertised adventure on which Major I. T. Burwash, of the government service, has embarked. Major Burwash has started on a long patrol from the mouth of the Mackenzie River to Hudson's Bay. It goes alone on his two legs, expects to be two years on the journey, and to live with the Eskimos he encounters on the way.

He will study the country, estimate the population, make astronomical and meteorological observations, and take notes on bird, animal and floral life. He expects at the end of two years to come out either at Repulse Bay or Chesterfield Inlet, as convenient to the end of the trip may determine.

There is no great publicity about the expedition, but it is one of the most important in the Canadian service to make these long and arduous northern journeys. The department of the interior is forever doing it, as arctic men of the Mounted Police. There is scarcely a day in the history of the department that does not contain a brief but graphic report of a trip covering long months and thousands of miles on foot, by canoe, dog sled and snowshoes. These trips are often made by men of action, not writers, and some wonderful books of travel would appear.—Regina Leader.

London Zoo Loses Old Exhibit

White Bear Has Been Exhibiting Feature For 22 Years

Sam, the great white bear which has been one of the most interesting features of the London zoo for 22 years, was recently sentenced to die a military death and was formally shot on June 16th. He had been sentenced to take a bath, although, when in his prime, scrupulous attention to his appearance was one of his many peculiar characteristics.

The reason for Sam's loss of interest in life is domestic. For 10 of his 24 years he was the long-haired husband of a wife even more famous than himself. She died and efforts to find Sam a new wife failed.

Lizzie, three years old and decidedly dapper in her ways, was introduced, but Sam resisted all her charms, treating her with rude contempt until one day Lizzie angered him beyond endurance and he ducked her in the pool.

Since that time, Lizzie has been Lizzie's career as Sam's wife, and nearly ended Lizzie's life.

Respect For Law

If Chicago has had its time as many municipalities as all Canada also cannot find the "new country" excuse for its lawlessness.

It is an English law-abidingness wonderfully in the newest countries on earth.—Brooklyn Eagle.

Minard's Liniment used by physicians

Physicians of Imperial Airways, British air transportation company, The Imperial Airways, which came into existence May, 1924, recently completed 1,000,000 miles of flying. During the past 12 months aeroplanes carrying 310,000,000 worth of baggage, passengers and 1,000 tons of freight have flown across the channel at 100 miles an hour.

English Oaks Becoming Rare

Not Good For Use Until Tree is 400 Years Old

England's famed oaks are disappearing. Many oaks were cut down during the war, as the wood was urgently needed. Said a botanist, "The wood of an oak is not really any good until the tree is 400 years old, and people today cannot afford to grow oaks for posterity. Originally large parks of England were covered with oaks. The tree is almost a rarity now in some places. It is said that an oak takes 400 years to grow to full size, is mature for another 400 years, and 400 years more to die. In some cases I should say this is true."

HUNTERS!

THE EMPRESS EXPRESS

Published in the interests of
Empress and District.

Thursday, Sept. 17, 1925

G. M. Johnston, arrived in town, Thursday last, returning to Medicine Hat on Saturday.

Mrs. Yeaman, of Lemster, Sask., was here for a couple of days last week visiting her son in the hospital.

Miss Gausman, the matron at the local hospital has been ill with influenza during the past week, but is now improving.

J. McCurdy, Jr., of Josephine, is in the hospital with a broken arm.

Some of the local hunters were out early Tuesday morning, duck shooting.

A. Lush, of Guelph, Ont., who has been visiting with his brother, Dave, for a few days, returned home, Monday. He also shipped east, three carloads of feeder stock.

The dance held on Friday last, did not draw a big attendance, but is reported as most enjoyable.

F. Duxee, who has had charge of the Castle Cosmo circuit for the United Church, is returning on Monday next to Toronto.

A Corn Roast and Social will be held at Mayfield School on Friday evening September 18, beginning at 7 p.m. Tea will be provided, ladies bring lunch. Enough corn for all to eat and a good social time.

Carelessness in handling of guns during the hunting season causes many a fatality. Be thoughtful of others as well as yourself. Take every care in this respect and always "be sure."

If you are needing indoor plants, bulbs, small fruit trees, etc., for spring or winter planting, order from Mrs. Sexton, agent for the Famous Nurseries.
